

Everything is a plugin.

A small workspace for files, terminals and ideas.

- 01 Open a local folder with the workspace button.
- 02 Create a local terminal with Command + T.
- 03 Open Markdown, HTML or PDF from Explorer.
- 04 Save text changes with Command + S.
- 05 Use Git and SSH from the activity bar.

One tab strip. Independent shell sessions.

One Dark Pro and Light themes.
